Objet: **New dynamic search functions for labgenvet.ca**

Dear customers,

The Laboratory of Veterinary Genetics (Labgenvet) of the Diagnostic Services, Faculty of Veterinary Medicine, Université de Montréal, is proud to announce new dynamic search functions for genetic diseases of the dog and cat on its web site www.labgenvet.ca. Now, searches of genetic diseases, in either English or French, can be performed by disease name, by breed of animal, or by medical system.

Dog Genetic Disease Search

Search by disease Search by breed Search by system

Please take a couple of minutes to explore these new tools developed for veterinarians.

Dog genetic diseases:
